

Science Club

“Eskom Expo for Young Scientists is an exposition, or science fair, where students have a chance to show others their projects about their own scientific investigations. At the annual prestigious Eskom Expo for Young Scientists International Science Fair (ISF), selected students from 35 Expo Regions in South Africa then compete against their country and around the world.”

Spine Road High participates in the Eskom expo for young scientists by conducting a science club hosted at the school. Interested learners work in collaboration with their science teacher in order to create science in the form of a research project. The research project provides learners with an opportunity to show their creativity (science)

to other schools by competing in the annual Eskom Expo for young scientists.
